PROFESSIONAL SUMMARY

Result-driven Computer Science graduate with a Second Class Upper honors standing (4.39 CGPA) and extensive experience engineering AI solutions, full-stack architectures, and web systems. Proven technical leader who steered a development team to the National Finals of the Huawei ICT Academy Innovation Competition. Demonstrable track record managing client projects, launching community-scale applications, and presiding over student bodies of 2,000+ peers. Highly skilled in leveraging machine learning frameworks, data mining, and responsive full-stack technologies to deploy production-ready applications.

CORE COMPETENCIES & TECHNICAL STACK

- **AI / Machine Learning Engineering:** Model Training (Python), MindSpore Framework, Multilayer Perceptron (MLP) Neural Networks, Python, TensorFlow, Keras, NumPy, Pandas, Feature Engineering, Explainable AI (XAI)
- **AI-Assisted Workflows:** Prompt Engineering, Vibe Coding, Natural Language Dev Workflows, AI Pair Programming, Rapid Prototyping
- **Full-Stack Development:** React, TypeScript, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Node.js, Express.js, PHP, Java, C++, RESTful APIs, GitHub API integration
- **Databases & Systems:** MongoDB, MySQL, System Integration, Server & State Management, Database Modeling, Systems Analysis & Design
- **Data & Security:** Data Mining, Outlier Analysis, Simulation, Cloud Computing, Cybersecurity Fundamentals
- **Soft Skills:** Agile Methodologies, Strategic Planning, Technical Writing, Team Leadership, Cross-sector Partner Management, Public Speaking

SELECTED PROJECTS

TechTrust — AI Developer Credential Verification (Flagship Final Year Project) |

2025 - 2026

- **Description:** Designed and developed an AI-powered verification platform that matches authentic developers with recruiters.
- **Impact:** Integrated a Huawei MindSpore MLP neural network with the GitHub API to thoroughly assess code authorship and developer skill metrics.
- **Recognition:** Led the development team as Team Leader to the National Finals of the Huawei ICT Academy Innovation Competition.
- **Stack:** MindSpore MLP, Node.js, Express.js, MongoDB, GitHub API, REST APIs

Sentinel — Multimodal AI Content Moderation Console (Client Project) | 2026

- **Description:** Engineered a live, production-grade multimodal content moderation management dashboard.
- **Impact:** Built and deployed Transformer text classifiers paired with Convolutional Neural Networks (CNNs) for image analysis to flag hate speech, violence, and harassment in real time.
- **Stack:** React, Hugging Face Transformers, CNNs, Python, WebSockets

Aquality.ai — ML Water Quality Predictor (Client Project) | 2026

- **Description:** Implemented an end-to-end machine learning application predicting water potability based on physical and chemical metric tracking.
- **Impact:** Curated training datasets, engineered high-value features, and introduced explainable machine learning output layers to provide user transparency.
- **Stack:** Python, Scikit-Learn, React, Tailwind CSS

ChurnGuard AI — ANN Customer Churn Protection (Personal Project) | 2026

- **Description:** Developed an Artificial Neural Network (ANN) customer retention engine equipped with an interactive analyst dashboard.
- **Impact:** Configured explainable AI modules giving feature-attribution insights alongside optimized batch-scoring scripts.
- **Stack:** TensorFlow, Keras, React, Python, Tailwind CSS

Nova — AI Chatbot Builder (Client Project) | 2026

- **Description:** Engineered a customizable customer support platform allowing organizations to spin up bespoke AI agents.
- **Impact:** Developed a single-window editor allowing immediate configuration of chatbot persona, data knowledge graphs, and tone guidelines backed by live-streaming text inference response UI.

- **Stack:** React, Large Language Model (LLM) APIs, TypeScript, Tailwind CSS

FUDMA Tech Hackathon & Chapter Identity Platforms (NACOS Presidency Project) | 2026

- **Description:** Spearheaded the development of official platforms for the regional community. Built the interactive FUDMA Tech Hackathon Website to register users for 5 track challenges, and developed the NACOS FUDMA Chapter Hub to broadcast executive profiles and digital event structures.
- **Stack:** React, TypeScript, Tailwind CSS

Additional Notable Deployments (2025–2026)

- **Faculty Conference Platform (2025):** End-to-end registration, scheduling, and speaker management interface for the Faculty of Computing.
- **Kusada Local Government Portal (2026):** Designed an official-style, multi-department web presence serving citizen news.
- **NACOS Sports Portal (2026):** Built fixture algorithms and real-time standing tracking tables for local departmental sports.
- **Ramadan Reminders App (2026):** Mobile-first utility application delivering daily digital reflections across campus networks.

EDUCATION & EXPERIENCE

B.Sc. Computer Science — Federal University Dutsin-Ma (FUDMA) 2022–2026

- **Academic Performance:** Graduated with a Second Class Upper honors standing (CGPA: 4.39)
- **Core Coursework:** Software Engineering, Advanced Data Structures & Algorithms, Artificial Intelligence & Machine Learning, Cloud Computing, Cybersecurity, Applied Data Mining, Systems Analysis, Computer Simulation

Freelance Web Developer & Contractor — Self-Employed 2025–Present

- Consult with commercial clients to architect, build, and optimize scalable, responsive front-end applications and server infrastructures.

Student Industrial Work Experience Scheme (SIWES) — ICT Center / Training 2025

- Designed, built, and tested interactive developer tools including an architectural FUDMA Student Portal UI Clone, Football Quiz App with state leaderboards, and persistent Local-Storage Task Managers.

LEADERSHIP, HONORS & AWARDS

National Finalist Team Leader — Huawei ICT Academy Innovation Competition *Jan 2026*

- Managed cross-functional resources and abstract architecture to successfully represent FUDMA at the national tier with the flagship TechTrust platform.

President — Nigeria Association of Computer Science Students (NACOS), FUDMA Chapter *2025–2026*

- **Hackathon Convener:** Conceptualized, budgeted, and executed the first-ever state-wide tech innovation hackathon in Katsina State across 4 stages with an approved ₦4.5M+ budget.
- **Strategic Partnerships:** Secured formalized, long-term ecosystem partnerships with 4 prominent regional tech centers including Lumilab, Kirkira, Kebram Tech, and the Katsina State Directorate of ICT.
- **Ecosystem Expansion:** Spearheaded student technology incubation by introducing specialized technical subsets: the Tech Guild and Tech Lite dev clubs.
- **Institutional Scope:** Convened 6 regional tertiary institutions to centralize tech literacy events across Katsina.

President — Faculty of Computing, FUDMA *2022–2026*

- Advocated for and represented over 2,000 computing students in university governance, resource allocation, and academic policy reviews. Previously elected and served as Faculty Sports Director prior to the Presidency.

CERTIFICATIONS

- Career Essentials in Generative AI — Microsoft & LinkedIn (Jun 2025)
- Generative AI: The Evolution of Thoughtful Online Search — LinkedIn (Jun 2025)
- Ethics in the Age of Generative AI — LinkedIn (Jun 2025)
- Introduction to Artificial Intelligence — LinkedIn (Jun 2025)
- Microsoft 365 Copilot Framework for Enterprise Workflows — LinkedIn (Jun 2025)
- HTML Certification — Online Assessment Engine (2024–2025)
